

Q&A on MMR Vaccine

Q Are the vaccination side effects really horrifying?

- 5%-10% of the vaccinees may develop symptoms such as low-grade fever, rash, swollen lymph nodes, and joint pain beginning 5-12 days after vaccination. The majority of the symptoms will gradually subside.

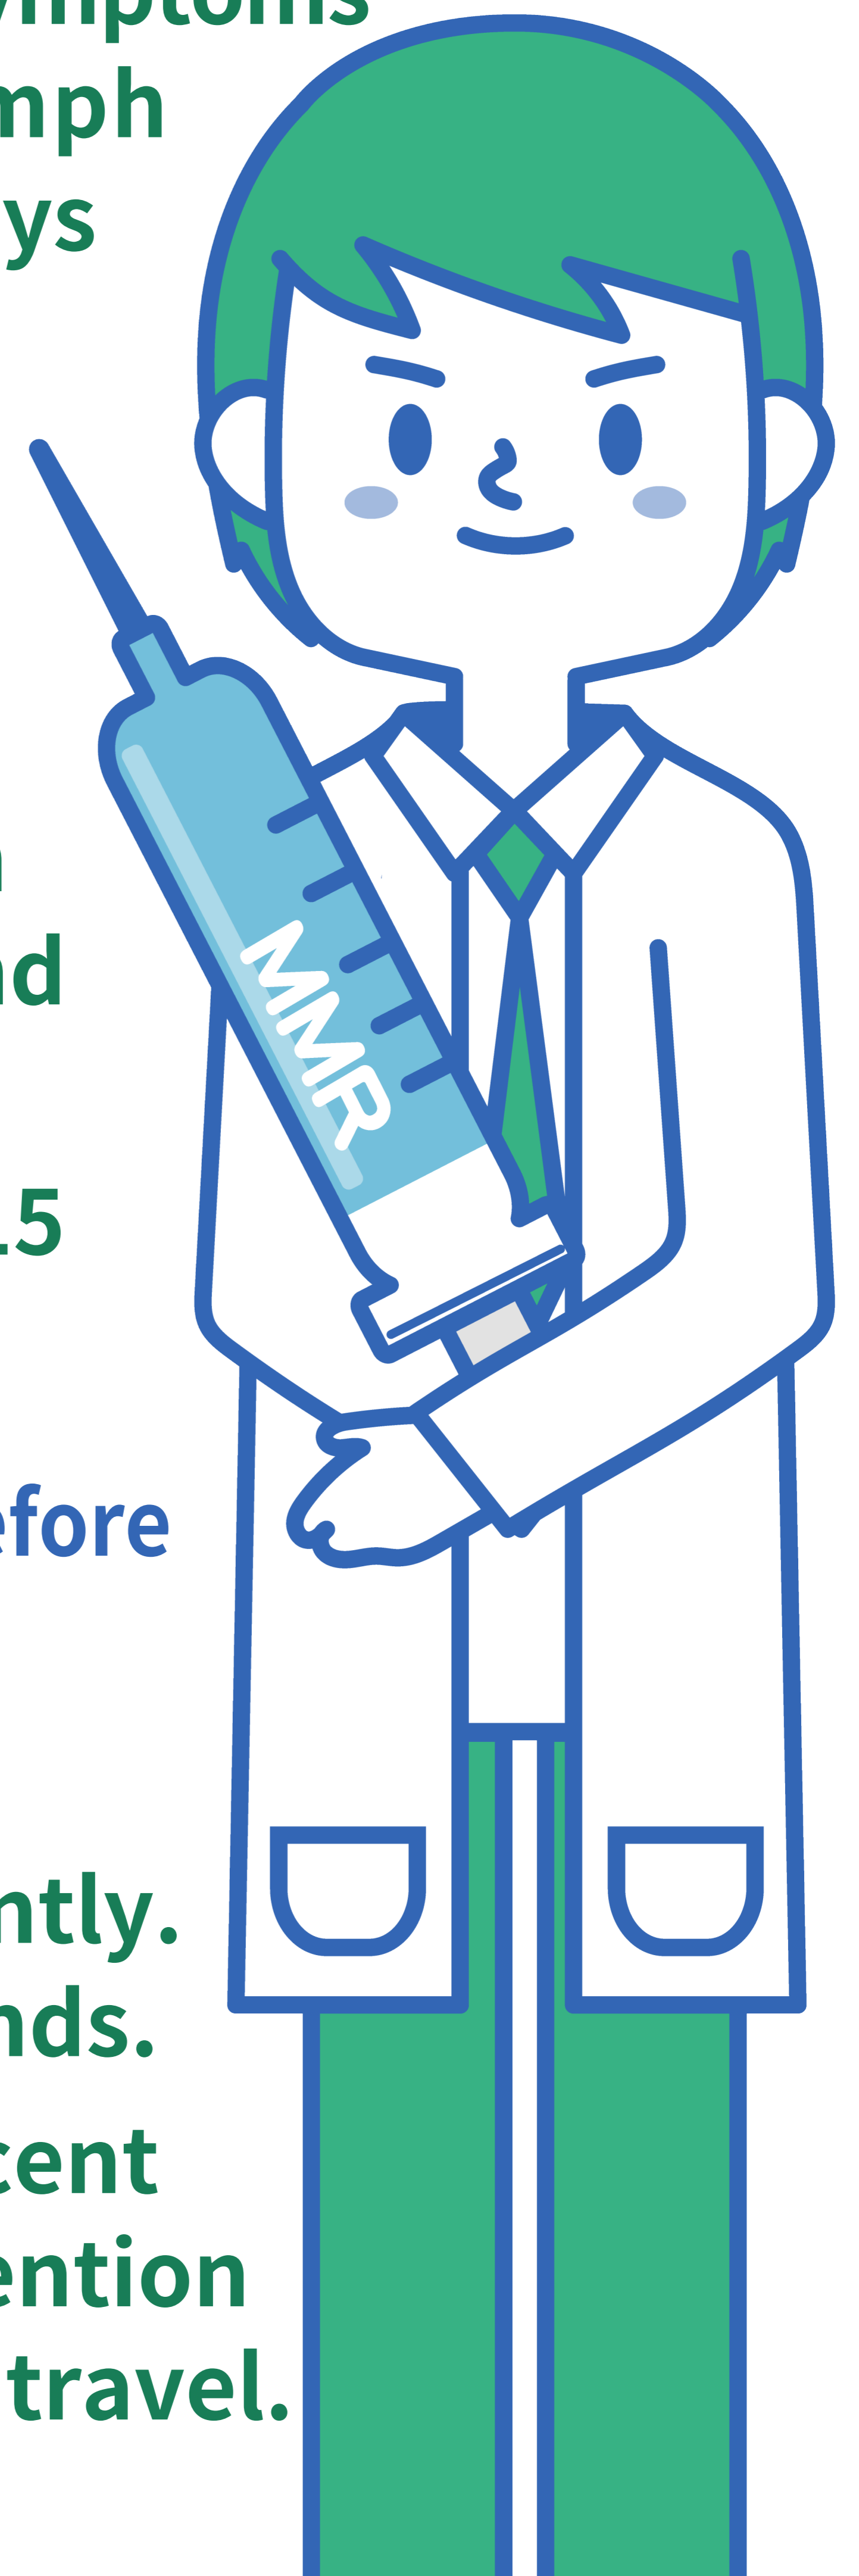

Q What are the benefits of the vaccination?

- The vaccine helps prevent infection with 3 diseases, including measles, rubella and mumps.
- 2 doses of the vaccine can offer at least 15 years of protection against the diseases.

Q What if you cannot get vaccinated in time before travelling overseas?

- Avoid visiting crowded public places.
- Wash hands with soap and water frequently.
- Avoid touching nose and mouth with hands.
- Be sure to inform your doctor of your recent travel history when seeking medical attention after returning to Taiwan from overseas travel.
